There has been quite an excitement here, occasioned by the arrival at this port of the pirate steamer Sunter. She came in here on the 18th of August, being in want of coal and other supplies. The moment she came in, our United States Censul, Henry Sawyer, esq., went at once to the Governor, and protested, in the name of the United States, not to have her supplied with coals, and requested the to have her supplied with coals, and requested the Government to drive her (the Sumter) out of port; but they would not do it, and furthermore allowed her to take in coal, but they found a allowed her to take in coal, but they found a live Yankee where they least expected it. THE ALLEGED INFASTICIDE.-Yesterday the police arrested the physician charged with killing the infant of Mrs. Baker at No. 334 Greenwich street. His name is Dr. Charles Lobel, residing at No. 57 Second street, and not Dr. Wilson, as was stated in the verdict of the Coroner's Jury on the strength of a voluntary statement made by the mother. The prisoner, it appears, has been in difficulties before on account of malpractice. Subsequent to his arrest he admitted to Coroner Jackman that he attended Mrs. Baker, the unnatural mother of the infant, and said that he had no fear as to the result of the charge made against him. He was anxious to give bail to answer before the Grand Jury, but the Coroner refused to accept a surety in less than \$10,000. As he was unable to find a bondsman to bail him in that amount, he was sent to the Tombs to await the action of the Grand Jury.

THE CHARTER COMMISSION .- This Commission net yesterday, at 3 p. m., Mr. Froment in the chair. day the examination in the case of the alleged aron of the steemboat Catiline, reached a conclusion. At 3 welcock the case was renewed before Justice Quackenbush, at the Jefferon Market Police Court.

John Hartley Churchill of No. 131 East Thirty ninth street,

John Hartiey Churchill of No. 131 East Thirty high street deposed as follows—I am a chemist; I have been sugard in eaperiments in water gas in France and in this causary; I have read the evidence of the augment of the Catiline as given in the newspapers.

Q. Will you state in what way a flamens described by the engineer of the Catiline issuing from the furnace doors could be caused?

engineer of the Carlline issuing from the farmece deers could be canced?

A. Upon reading the principal facts as stated by the angineer, I find that the damper was closed; that he was tewring is stoam at the fine; when the engineer first saw the flame is stoam at the fine; when the engineer first saw the flame be says it was 8 or 10 feet high, and kept issuing in a steady stream and that white he was watching it, the woodwork caught; the nature of the flame was gaseous and blue; these those prove the ensistence of water-gas or the duration of the flame, or steady generation and the color; why, it proves water-gas, and not "back draught," is because the flame was continuous; a back draught could only have been possible to a very limited extent with the dauper closed; This shows that there was water-gas, and nothing else. The way in which the engineer closed the damper, and then repended it, is sarreity such as would be most favorable to the production of water gas. The carbonic acid continued over the other of the world decompose, producing carbonic oxide. The earbonic oxide and steam in the same situation would act upon each other, and the steam would decompose. All the facts observed by the engineer are consistent with the theory of the exitence of water-gas, with air for feel.

On cross-examination the same testimony was repealed.

observed by the engineer are consistent with the theory of the existence of water-gas, with air for feet.

On cross-examination the same testimony was repeated. The connect for the defense then proceeded to argue the question of jurisdiction.

The Justice salunited that as a State magistrate it was conceed that he had no jurisdiction in the case.

Counsel continued to argue upon his second paint, that the Justice had no jurisdiction as I United States Commissioner in the case of a crime having been committed within the jurisdiction of another State. Besides, such anthority could not be conferred upon a Commissioner of the United States. The state is a second of the states of the states are also argued that this reased was navigating the waters of Virginia, adding that the Caviline was not a vessel of war, but was mixed birded by the Government, and not owned by it, was mixed birded by the Government, and not owned by it, the the prisoner he discharged by the Justice, instead of having any deciden as to jurisdiction. The evidence in the case was such as to establish the innocence of the prisoner, which was a very good reason for the discharge asked for.
